OBJECTIVE

Information Systems fresh graduate from Telkom University with a Certified Associate Data Scientist (CADS) from BNSP, and experience as a Project Control & Data Analyst Intern at PT Len Industri (Persero), managing project reporting dashboards with up to 100% data accuracy. Also built a Power BI study case dashboard (Power Query, DAX, star schema) that turns regional wage, price index, and population data into market expansion recommendations. Possesses data analysis competencies such as SQL, Python, and EDA, as well as an understanding of business processes through SAP Business Processes (SAP-AC010) and Procurement (SAP-SCM500) certifications. Experienced in guiding 32 student teams through Agile workflows and issue tracking via Atlassian Jira, and evaluating system design alignment through 96 structured progress review sessions to ensure 100% of teams met development targets on schedule.

EDUCATION

Telkom University – Bandung, Indonesia
Bachelor of Information Systems, 3.41/4.00 **2022 – 2026**

WORK EXPERIENCE

PT Len Industri (Persero) **June 2025 - Sept 2025**
Project Control & Data Analyst Intern

- Assigned to manage and maintain Google Data Studio (Looker) dashboards to support management needs for accurate project reporting, as well as simplifying large datasets into easily understandable insights for commercial decision-making.
- Redesigned the data collection flow amidst tight reporting deadlines, successfully achieving 100% data accuracy and accelerating the identification of operational improvement opportunities.

ORGANIZATIONAL EXPERIENCE

Enterprise Application Development Laboratory Assistant- Telkom University **Feb 2026 – Aug 2026**
Practicum Assistant for Software Project Development

- Guided 32 teams in implementing Agile workflows and issue tracking via Atlassian Jira, ensuring a more structured SDLC implementation and objective project evaluation reports.
- Evaluated system design alignment with software requirements through 96 project progress review sessions and technical feedback, ensuring 100% of the teams successfully achieved development targets according to the curriculum schedule/deadline.

Information Systems Student Association **Feb 2025 – Des 2025**
Coordinator of Dedikasi Masyarakat Bureau

- Addressed the gap between community needs and organizational resources by analyzing the requirements of 5 fostered communities/locations and leading coordination with 2 external institutions, ensuring community service program designs were completed on time.
- Led the execution of over 10 community service programs alongside a 12 member team, reaching more than 100 beneficiaries, resulting in all programs being executed according to targets with a 95% success rate.

Enterprise Data Management Laboratory Assistant- Telkom University **Aug 2024 – Nov 2025**
Head of Human Capital Management Division

- Addressed recurring operational bottlenecks in the laboratory by evaluating the performance of a 32 member team and restructuring the recruitment and training pipeline for 36 new members, resulting in a 90% increase in team work process efficiency.
- Streamlined administrative workflows for the execution of events across 5 divisions, ensuring seamless inter-team coordination until the completion of the events.

RESEARCH & PROJECTS

Sentiment Analysis of BPJS Kesehatan Services | Final Year Thesis
https://www.youtube.com/watch?v=XAgMnBU9idg

- Addressed the need to understand public perception of government healthcare services by building a Natural Language Processing (NLP) pipeline using IndoBERT and BERTopic models to analyze over 5,000 data points from social media X and Instagram. Successfully identified 5 main topics aligned with the SERVQUAL theoretical framework dimensions and formulated structured evaluations to support data-driven service improvements, achieving an 86% model accuracy and an average F1-score of 92%.

Market Expansion & Risk Assessment Dashboard | Power BI Study Case Project
https://github.com/daniellincolnginting/Market-Expansion-PowerBI

- Addressed the tendency of expansion planning to rely on population alone by building a three page Power BI dashboard that combines purchasing power (provincial minimum wage), price index (CPI), and population across 34 provinces for 2024–2025. Modeled the data with Power Query and a star schema, built DAX measures such as Avg_Inflation and Market_Score, and designed a quadrant scatter plot with conditional formatting to classify provinces as value, volume, niche, and cost-watchlist markets for year-based expansion recommendations.

Environmental Sound Classification System | Advanced Data Mining Project
https://github.com/daniellincolnginting/Environmental-Audio-Analysis

- Developed a Convolutional Neural Network (CNN) model based on the ResNet50 architecture to classify 50 environmental sound categories from the ESC-50 dataset. Processed raw audio signals into 3-channel visual representations (Mel-Spectrogram, Delta, Delta-Delta), achieving an 87% classification accuracy and successfully deploying it as an interactive web application using Streamlit.

CERTIFICATIONS

Associate Data Scientist — Badan Nasional Sertifikasi Profesi (BNSP), November 2025

SAP Processes in Procurement (SCM500) — SAP Edugate, December 2024

SAP Business Processes in Financial Accounting (AC010) — SAP Edugate, December 2023

SKILLS

Interpersonal
Cross-Functional Coordination, Team Leadership, Stakeholder Communication, Problem Solving, Adaptability.

Technical

- Data & Analytics: Machine Learning, Exploratory Data Analysis (EDA), Data Cleaning, SQL, Python, R, NLP
- Visualization & Tools: Microsoft Excel, Google Spreadsheet, Power BI, DAX, Power Query, Data Modeling (Star Schema) , Google Data Studio (Looker Studio)
- Product & Process: Software Development Lifecycle (SDLC), Enterprise Resource Planning (SAP ERP),
- Business Process Mapping, Enterprise Architecture (TOGAF, ArchiMate), Atlassian Jira
